

CLAIMS

1. A packaging material using a film laminate in which a heat sealing agent with a low melting point is applied to a prescribed zone of an oriented film made of a synthetic resin, a cutting line is cut in the oriented film made of a synthetic resin in the form of a solid or broken line passing through the zone coated with the heat sealing agent, and a cast film made of a synthetic resin and having heat sealing properties is affixed to the oriented film made of a synthetic resin.

2. A packaging material using a film laminate in which a release agent is applied to a prescribed zone of an oriented film made of a synthetic resin, a cutting line is cut in the oriented film made of a synthetic resin in the form of a solid or broken line passing through the zone coated with the release agent, and a cast film made of a synthetic resin and having heat sealing properties is affixed to the oriented film made of a synthetic resin.

3. The packaging material according to claim 1 or claim 2, in which a thermally insulating flexible sheet is placed on the surface of the oriented film made of a synthetic resin and affixed thereto partially or over the entire surface.

4. A packaging material using a film laminate in which a cutting line is cut in the form of a solid or broken line in a cast film made of a synthetic resin and having heat sealing properties and a thermally insulating flexible sheet is placed on the surface thereof and affixed thereto partially or over the entire surface.

5. A packaging material comprising a cover using the packaging material according to any one of claims 1 to 4 and provided with an excess portion and a container

onto an opening of which the cover is heat-sealed, in which the cover has a larger area than an area of the opening of the container and the excess portion of the cover dangles from the upper end of the container and is adhesively bonded to the container at the end portion thereof.

6. A packaged product in which processed food, various food products, various foodstuffs, medical instruments, or containers are tightly sealed with the packaging material according to any one of claims 1 to 5.
